

# GIGABIT BROADBAND VOUCHER SCHEME

Tradecor Solutions

## Gigabit Broadband Voucher Scheme

Get full fibre to your business through the DCMS gigabit voucher scheme

The Gigabit Broadband Voucher Scheme is live - and your £3,000 is a click away!

As of 27 March 2018, the Government's Gigabit Broadband Voucher Scheme is live, nationwide, and supported by a £67mil funding pot.

Designed to enable your business to receive 'gigabit-capable' connectivity, the scheme is built on the basis of giving access to a faster, more reliable connection.

As an added incentive to experience gigabit broadband, the scheme provides free installation worth up to £3,000.

In our gigabit knowledge hub you'll find the answers to:

- What does gigabit mean for my business?
- How does the Gigabit Broadband Voucher Scheme work?
- How do I know if my business is eligible for a gigabit voucher?
- How do I claim my voucher?
- The Gigabit Broadband Voucher Scheme was originally trialled in November 2017, with a handful of UK regions given the opportunity to apply for government subsidised gigabit connectivity.

Off the heels of the pilot, where 1,000 vouchers were issued, the national rollout gives your business access to the gold standard of connectivity, gigabit, and is a solid step towards erasing slow broadband for SMEs.

In the gigabit scheme's trial Tradecor Solution were a leading provider having delivered vouchers in the London region, recognising the scheme as a solution to helping UK business to receive the ultrafast broadband connectivity which is vital to competing in the global economy.

With the expansion into a national scheme, and many more vouchers now on offer, businesses around the UK will benefit from our rapid deployment of full-fibre connections and hands-on customer support.

As Tradecor Solutions invests in its own high-speed infrastructure, we're not beholden to seeking permission from Openreach, meaning we're empowered to deliver the connectivity your business needs.

During the gigabit scheme's initial trial, we helped businesses to digitally transform. Voucher recipients upgraded their infrastructures to receive full fibre to their offices, opening up a world of possibilities, like moving to the cloud with Microsoft Office 365. With the scheme going nationwide, your business can join them too!

As we join the government in pledging 'full fibre' gigabit-capable broadband to businesses like yours, below you'll find a guide to what you need to know about the Gigabit Broadband Voucher Scheme, including eligibility, benefits, and the easy steps for applying.

What does gigabit mean for your business?

Faster internet access for increased productivity

Download speeds starting from 100 Mbit/s

Unlimited data usage

Installation free of charge (worth up to £3,000 via the [Department for Digital, Culture, Media and Sport](#))

How does the Gigabit Broadband Voucher Scheme work?

The key steps are:

- Check the eligibility of your business
- Select the right Connection package for your business
- Get in touch with us
- TSL will update DCMS regarding your connection and voucher
- Your local council will review and approve your voucher
- TSL will then deliver your connections and manage completion through the Scheme portal
- Your local council will carry out final checks
- You just then need to pay the VAT on the connection and the monthly charges for your new, ultrafast, gigabit-capable connection

How to find out if your business is eligible for gigabit connectivity through the scheme
